ABOUT ME

Hello, my name is Ball and I'm looking for a full stack developer job. I have experience in programming for about 5 years. I usually use laravel for development. Nowadays there are new technologies, so I can always study new languages. Currently, I'm a freelancer with work. For example, create an online table reservation system. Store owners can design their own store layouts using REACTJS, EXPRESSJS to develop the PHP LARAVEL postal system. Reference works:
<https://www.youtube.com/watch?v=CRKDOvCW3i0>,
<https://www.jongtable.com/replayground> and many other works
